

Veracity Index

Current Information Values

UPDATED 01/14/06

Veracity Index determines how “real” a fact posted on the Datapool is. Based on the topic’s VI, this can mean the percentage chance that a character may be able to find the object or data in a given game, or correspondingly, if the information has been given a monetary value in NCD, its VI percentage will determine just how much money the character will be able to get for selling that data to an interested party (*example: knowing where a stash of weapons has a value of 100NCD to an interested party, but since the VI is only 50%, you will only be able to net 50NCD by selling that information.*) Party interest is based on Ref’s decision.

ATF-37B THUNDERHAWK (CHROME 3, PG 48) 90%

Militech has been decommissioning this model fighter in favor of a new upgrade. There are rumored to be at least 1-3 (1D6/2) of these now obsolete, medium, multirole fighterjets stored in a secured warehouse in the desert just east of the Santa Diego Integrate. Each is worth @ 20,000 NCD in their current disassembled state.

PHANTOM FROGS 10%

There has been a consistent rumor that frogs have been heard in the lower Ocean Zone regions of the San Fran Integrate Hub. Since the last frog went extinct in 2011, a new discovery might be worth quite a lot (\$20,000) to Biotechnica or the RipTide Confed.

MOORE TECH SHEOL (CHROME 3, PG 94) 22%

It’s been semi-confirmed that Moore Technologies did actually build a heavy duty hazardous operations bodyshell capable of entering some areas of Night City currently unreachable even by advanced Cee-metals. Both the Cee-Metal and Edgerunner aktcults would be interested in getting their hands on one of these units.

DYNALAR TECH WAREHOUSE 90%

Street gossip is that an old Dynalar Technologies office was discovered in the flooded areas underneath the Night City Oceanzone Undercity. Data on this arehouse can be found in the *Night City Sourcebook*, page 66. Inside are rumored to be several sealed pallets of Cyberfingers (*Chrome 3*, pg. 22) with a resale value of over 2000NCD

JOHNNY SILVERHAND IS NOT DEAD 10%

Word on the street is that the famed Rocker Johnny Silverhand did not die in the assault on the Arasaka Towers in 2024, but instead was seen being carried from the ruins by a tall, blue metal cyborg. Data is that Silverhand is now living in a Cee-Metal Gemini model bodyshell in the San Francisco Integrate.

NET ACCESS 85%

Looking for a back door into the Old Net? There’s a portal in an old police call box along the HighCity Roadzone east of the Santa Diego Hub. This access point will give you control of all traffic lights and freeway ramp gates for a 1D10 minute period—until the RABIDS [C3, pg. 16] show up to kill you.
